Universities and research institutions in Hungary are offering hosting opportunities for researchers interested in preparing and submitting proposals under the **Marie Skłodowska-Curie Actions – Postdoctoral Fellowships 2026 (MSCA PF 2026)** call.

Researchers from the Republic of Moldova are eligible to apply, as MSCA Postdoctoral Fellowships are open to researchers of any nationality. Applicants must hold a doctoral degree or have successfully defended their doctoral thesis by the call deadline. As a general rule, they should have no more than eight years of research experience after obtaining their PhD and must comply with the mobility rule established under the programme.

The available hosting offers cover a wide range of research fields, including:

- artificial intelligence, language models, data science and digital transformation;
- bioinformatics, microbiology, genomics and antimicrobial resistance;
- quantum chemistry, molecular simulations and drug design;
- renewable energy, smart grids and energy storage;
- immunology, autoimmune diseases and the complement system;
- psychology, neuropsychology and digital tools for neurorehabilitation;

The project proposal is jointly prepared by the researcher and the host organisation in Hungary, together with the prospective scientific supervisor. Interested researchers are encouraged to review the available offers, identify the organisation and research team that best match their field of expertise, and contact the prospective supervisor well in advance to begin developing the proposal.

Further details about the host organisations, research fields, scientific supervisors and contact information are available [here](#).
