

4th SSbD Boot Camp

By marianna.roman, 22 July, 2026

PARC, the EU partnership for the risk assessment of chemicals, is organizing the **4th SSbD Boot Camp**, in **Athens (Greece)**, from **21 to 23 October 2026**. The event will bring together participants interested in applying the Safe and Sustainable by Design (SSbD) framework in practical research and innovation contexts. The programme will focus on key aspects of SSbD, such as scoping analysis, molecular redesign, early screening, and decision making.

For more information and how to apply for the 4th SSbD Boot Camp organized by PARC, please visit the official [website](#) and **complete the application form by August 31, 2026**. Applications will be evaluated by field experts and decisions on successful applicants will be announced via email by the end of August/beginning of September 2026. Participation in the PARC SSbD Boot Camp is free of charge. However, participants are responsible for covering their travel and accommodation expenses.
