

RECOVER-E: LaRge-scale implementation of COmmunity based mental health care for people with seVere and Enduring mental ill health in EuRopE

Objective: For nearly 900 million people living in Europe, mental disorders constitute the most significant yet most neglected public health problem: depression affects an estimated 30.3 million Europeans, and psychotic disorders 5 million Europeans.

People with severe and enduring mental ill health want the same things out of life as other citizens but are often placed in a vulnerable position and are hence afforded less opportunities to attain their goals and thus experience a lower quality of life, and have a lower life expectancy compared to the general population. For many countries that have undergone mental health services reform or have health systems in transition, efforts to make such comprehensive community-based mental health services available resulted in short-lived outcomes or are still to demonstrate substantial impact.

RECOVER-E's aims to ensure well-functioning community mental health teams in 5 countries in Europe (Macedonia, Romania, Bulgaria, Croatia, and Montenegro), which will serve as the central node for coordination and provision of care for people with SMI. Our project narrows the implementation gap by going beyond infrastructure changes and pursuing the development of human resource capacity and care pathways that can be distilled in a comprehensive pathway to scale for regional and national decision-makers for uptake after the project's life span.

RECOVER-E will:

- Develop evidence based care pathways and treatment protocols for transition to scale for regional and national decision makers in 5 implementation sites;
- Establish a peer to peer capacity building partnership in community mental health by linking a European expert panel with key stakeholders in 5 implementation sites to co-create community mental health services for people

with SMI);

- Evaluate intervention elements that will enhance sustainable adoption and implementation of community-based mental health care for people with SMI, by carrying out implementation research.

Funding scheme: RIA - Research and Innovation action

Coordinated by: STICHTING TRIMBOS - INSTITUUT, NETHERLANDS INSTITUTE OF MENTAL HEALTH AND ADDICTION, Netherlands **Moldovan partner:** SOCIETATEA PSIHIATRILOR, NARCOLOGILOR, PSIHOTERAPEUTILOR SI PSIHOLOGILOR CLINICIENI DIN REPUBLICA MOLDOVA UNIVERSITATEA DE STAT DE MEDICINA SI FARMACIE NICOLAE TESTEMITANU DIN REPUBLICA MOLDOVA **Programme:** H2020-EU.3.1.6. Health care provision and integrated care

Start Date - End Date: 01.01.2018 - 30.06.2021

Duration: 42 months

Overall budget: € 3 355 000 EU contribution € 3 355 000
