

Registration is open: European Robotics Forum (ERF) 2024

The next edition of the “**European Robotics Forum**” will be held in Rimini from **13 to 15 March 2024** under the scientific responsibility of the University of Bologna. The event will see the leading experts, both academic and industrial, at international level in robotics come together in the vibrant city of Rimini and will see the presence of the major European companies with interests in this field. The forum has a unique structure and is specifically designed to encourage interaction between end-users, researchers, technology producers with the ultimate goal of improving industrial competitiveness, fostering scientific progress, stimulating networking between stakeholders in the field, and identifying new impactful application scenarios for robotics. The programme of the event is really rich and will touch many industrial and research fields where robotics plays a key role. Having this audience of experts all gathered in Italy is truly an exceptional event that we believe can be a driving force for the competitiveness of the entire territory.

The event will take place at the magnificent Convention Centre in Rimini and will be enriched with an intense social activity to foster the exchange of ideas, revive old friendships and create new ones. A large exhibition area at the convention centre will be available to those who wish to display their technologies and ideas, representing a true international showcase.
