

1st CEF Digital Community Event

The European Commission, in close collaboration with the European Health and Digital Executive Agency (HaDEA), is organising the first Connecting Europe Facility - CEF Digital - community event.

1st Connecting Europe Facility Digital community event

The event will gather all the projects funded under the CEF Digital programme and players from all segments of the connectivity value chain in order to share experience, identify collaboration needs, strengthen synergies and contribute to maximising the programme's impact on policy goals.

By engaging in discussions and exchanges of ideas, the CEF Digital community will bring new insights into the reflections on future connectivity policies and investments as outlined in the White Paper.

The morning will be dedicated to a presentation of the projects' common objectives, with a focus on the identification of possible future synergies, while in the afternoon, the attention will shift to exploring financing options for connectivity infrastructures.

The registration for this event will open soon. We invite you to monitor the [official page](#) for further information.
