Photonics21 has recently published three thematic reports focusing on industrial applications of high relevance for photonic technologies: Defence, *Virtual Worlds and High Performance Computing*. The reports outline the respective markets and analyse the potential of photonics for these sectors. They also provide a reflection on the [European Commission's defence industrial strategy](#), the [Virtual Worlds strategy](#) as well as the [European strategy for High Performance Computing](#). All 3 reports are now [available for download](#).
