

EF ECS 2025

The next edition of EF ECS – the European Forum for Electronic Components and Systems is set for December 3–4, 2025 in Malta. The event will focus on boosting innovation and European competitiveness in the ECS sector.

This year's theme, "Accelerate Innovation: Building European Competitiveness," emphasizes value chain security, sustainability, and the exploration of emerging market opportunities. Key features include insightful keynotes and discussions on cutting-edge topics like quantum tech, cybersecurity, and AI.

Attendees will have the chance to network with over 700 stakeholders from Europe's semiconductor and ECS ecosystem, as well as strengthen the Chips Joint Undertaking mission. The event aims to celebrate progress and shape the future of the ECS value chain. Registration details will be available soon.
