The Moldovan Office for Science and Technology (MOST) is pleased to present the latest edition of the “**Horizon Success Stories**” brochure, published by the IGLO Network – the Informal Group of R&I Liaison Offices in Brussels.

This publication features over 30 inspirational examples of European projects (including from Moldova) funded under Horizon Europe that have made significant contributions in areas such as:

- green energy and hydrogen storage (EUH2STARS, H2START),
- health and non-communicable disease prevention (YoPA, BE-SAFE),
- ecosystem restoration and sustainable resource management (DANUBE4all, DeepHorizon),
- quantum technologies and space communication (QuTechSpace),
- artificial intelligence for cybersecurity (EITHOS),
- educational innovation, bioethics, and narrative medicine (PREPARED, StoryPharm).

The brochure showcases the diversity and impact of international R&I collaborations and offers valuable inspiration for Moldovan researchers seeking to engage in EU Framework Programmes.

? The Republic of Moldova is proudly represented in the IGLO network through the **MOLDOVAN OFFICE FOR SCIENCE AND TECHNOLOGY (MOST)**, facilitating the connection between the national R&I system and EU opportunities in Brussels.
