

DEEPTech ACADEMY: LAB-TO-MARKET PROGRAMME

Transform research into commercial impact

When? February 17 – May 15, 2025

Where? iHub Conference Rooms + UTM Technical Labs, Chişinău

In today's innovation economy, research that stays in laboratories never reaches its potential. Academic expertise must translate into market value, and advanced technologies must move from scientific papers to products.

Deeptech Academy is Moldova's first Lab-to-Market programme for the academic community. This 12-week intensive teaches researchers, university faculty, and advanced students how to transform their expertise in AI, Machine Learning, and Data Science into viable products and investable ventures.

This isn't another theoretical course. It's a systematic transformation process: commercialization of science, product thinking, and innovation valorization – moving from research hypothesis to market-ready solution in three months.
