

Discovering AMI2030 – The European Advanced Materials Initiative

AMI2030 is the initiative that wants to propose a new vision of Advanced Materials for Europe to remain competitive. To meet citizens' needs, Europe has to develop a systemic approach for innovative advanced materials to offer faster, scalable, and efficient responses to the challenges and opportunities for Europe's society, economy, and environment.

The Initiative was born with the aim to accelerate the development of sustainable advanced materials as the backbone of the green and digital transition and a source of prosperity and sovereignty in Europe.

The Advanced Materials 2030 initiative propose a new approach through an open and inclusive forum to coordinate and maximize the impact of joint actions and projects by engaging all stakeholders of the advanced materials ecosystems in Europe. Any European organization with activities of significant relevance for advanced materials development, production and use, committed to a sustainable development can join the Initiative at any time.

The event “**Discovering AMI2030 - The European Advanced Materials Initiative**” is organized and promoted by **NCp4industry**, the network of the National Contact Points for HE – Cluster 4 Industry, as part of the project activities to increase awareness and share knowledge, on main related HE dossiers, with the EU R&I community.
