

Digital Assembly 2023

A digital, open and secure Europe.

On 15–16 June, the Swedish Presidency of the Council of the European Union and the European Commission will host the Digital Assembly on the theme of a digital, open and secure Europe.

The objective is for Europe to be at the forefront of technology and develop a competitive digital single market based on a strong focus on cyber security during the Digital Decade.

The Digital Decade provides the EU with opportunities for innovation, growth and competitiveness at global level to achieve a digital and open Europe. In addition, digitalisation is increasing rapidly, which means that security must be enhanced. A solid foundation – which is stated in the 2030 Digital Compass – is crucial to for the Digital Decade to succeed.
