

European Manufacturing Conference 2024

The European Manufacturing Conference is a biennial event that brings together key players in the European manufacturing industry, including policymakers, industry representatives, as well as academia, research & technology organisations, startups, scaleups and innovators.

The three organisers [EFFRA](#), [EIT Manufacturing](#) and [ManuFuture](#) share a common vision that cooperation is key in creating an enabling environment to address the most pressing challenges faced by the European industry and society today and tomorrow.?

?In 2022, the conference programme reflected, among others, the topics human centricity, green and circular manufacturing, connectivity and resilience.
