

The Future of EU Steel Research - How to foster EU steel leadership

Hybrid format Where: **Mönchengladbach, Germany, and online**

On 26 November 2025, the *Future of EU Steel Research* event will highlight how RFCS-funded projects are transforming Europe's steel industry through decarbonization, circularity, and industrial symbiosis.

The programme features two thematic sessions:

- Low to Zero Emission Iron and Steel Production
- Closing the Loop: Raw Materials, Circularity and Industrial Symbiosis

Participants will be able to discover the latest advances in energy efficiency, electrification, hydrogen-based steelmaking, and innovative scrap recycling. Beyond technical insights, the event as well offers a platform for dialogue between project experts, researchers, and policymakers on how EU research supports industrial transformation.
