

Webinar: Open Science Requirements in Practice – Horizon Europe

The **Open Science** framework is a core pillar of Horizon Europe, introducing clear mandatory and recommended requirements for all funded projects. Understanding and correctly implementing these provisions is essential for beneficiaries, coordinators and research support teams.

To support stakeholders in navigating these obligations, the Horizon Europe NCP Portal Academy is organising the webinar “**Open Science Requirements in Practice**”.

Date and Time

April 3, 2026

12:00 PM – 01:30 PM (CEST)

Online event

What the Webinar Will Address

- This session will provide practical guidance on:
- Mandatory and recommended Open Science requirements under Horizon Europe
- Open Access obligations for scientific publications
- Research Data Management expectations
- Preparation and implementation of Data Management Plans (DMPs)
- Reporting requirements for publications and datasets
- Available tools and services, including support from OpenAIRE
- The webinar is designed to translate policy requirements into practical steps, helping participants ensure compliance and improve the quality and impact of their project outputs.

Who Should Participate

Project coordinators and consortium partners

Researchers involved in Horizon Europe proposals or ongoing projects

Research managers and grant officers

Librarians and data stewards

Institutional support staff

This interactive session will also include time for questions, allowing participants to clarify specific compliance issues relevant to their projects.

For more details and **mandatory registration**, please access the official event page here:
