

Career opportunities for PRINCIPAL RESEARCHERS at Lithuania's competence centres

Profile picture for user doinita.ulinici

By doinita.ulinici, 31 March, 2026

Researchers are invited to join Lithuania's research community as **Principal Researchers** in one of the country's five newly established Competence Centres.

Research areas:

- Chips (semiconductors)
- Drones (autonomous, remotely operated and connected systems)
- Microbiome and precision medicine
- Plant phenotyping (for agriculture and agrobiological resources)
- Advanced disease monitoring

Current opportunities:

- The first three centres are currently recruiting for several positions.
- The Plant phenotyping Centre will announce vacancies soon.

Principal Researchers will play an important role in:

- Shaping the centre's research strategy and priorities
- Strengthening the quality of research and innovation in Lithuania
- Supporting the commercialization of research and technologies
- Enhancing Lithuania's international research collaboration

How to apply and more information is available on the [LINO website](#).

Interested candidates are encouraged to apply soon. The upcoming application deadlines are: 16 March, 31 March, 20 May.
