

Commission seeks feedback on the future European Innovation Act

By marianna.roman, 18 July, 2025

A key deliverable of the EU Startup and Scaleup Strategy, the European Innovation Act, has the aim to facilitate bringing innovative ideas to market across all sectors, to address challenges in commercialising research results, to strengthen collaboration between the industry and the academia, and to improve access of innovative companies to markets, finance, talent and infrastructures.

A [call for evidence](#) and a [public consultation](#) are open for contributions **until 30 September 2025** on Commission's '**Have your Say**' portal.

The survey gives stakeholders a chance to share their views, in particular on possible measures and how the initiative can help facilitate the establishment and growth of innovative companies in the European Union and enhance the diffusion of innovation across the EU Single Market.
