

Apply AI Sectoral deep dive - Mobility, transport, and automotive

This webinar explores AI-driven solutions for connected autonomous vehicles, intelligent mobility systems, and data-driven transport services.

This session is part of a [series of Apply AI thematic webinars](#), focusing on Commission's and private sector initiatives to accelerate AI adoption across the automotive and mobility ecosystem. The link between research excellence and deployment at scale will be on the spotlight, with a strong focus on real-world use cases, end-users, and SMEs.

Participation in the webinar is possible via the [live stream](#) on the Commission's YouTube channel and by submitting questions in advance or during the session via [Slido](#).

More information on the webinar can be found on this [website](#).
