

National Contact Point Networks partner search tools

Most of the NCP networks have been offering partners searches tools to their communities in the past. With the current reorganisation of the NCP networks due to the start of Horizon Europe, it is not clear how partner search tool offer will look like in the future, considering the updated service from the Funding and Tender portal presented before. In any case, do not hesitate to contact your national Contact Point (s) to benefit to this or other services they would offer you either nationally or at European level, as invitations to brokerage event, training sessions, periodic newsletters, relevant tools and so on.
