

ETIP SNET-RHC ETIP Joint webinar – Coupling of Heating/Cooling and electricity sectors in a renewable energy-driven Europe

This online session focuses on the implications of coupling the electricity, heating and cooling vectors as a vital part of efficiently decarbonising the whole European energy sector. The joint **White Paper** between ETIP SNET and ETIP RHC, "**Coupling of Heating/Cooling and Electricity Sectors in a Renewable Energy-Driven Europe**", will lay the ground for the panel and interactive discussion highlighting the actions needed to keep the timeline for decarbonisation that the Green Deal and Fitfor-55 packages prescribe. The study is available on [the Publications Office of the EU](#).
