

OSCARS Open Call for Open Science projects & services launch event

By marianna.roman, 29 November, 2024

OSCARS project is organizing the **launch event of the OSCARS 2nd Open Call for Open Science projects and services** to be held online, on Wednesday, 15 January 2025.

Researchers from all scientific disciplines are welcome to apply to the **2nd OSCARS Open Call before March 17th, 2025**, with proposals for the development of Open Science projects or services, that together will drive the uptake of FAIR-data-intensive research throughout the European Research Area (ERA).

Projects are funded with a lump sum between 100,000 and 250,000 EUR, and can be proposed in the fields of any of the Science Clusters and beyond, by any researcher or group of researchers.

By the end of OSCARS, it is expected that a series of valuable scientific results and new services will be available, leading to an increased uptake of Open Science by researchers and to promote cross-border and cross-domain cooperation in the long run.
