

JRC Open Access to Infrastructure - New call – EU Reference Laboratory for alternatives to animal testing

By marianna.roman, 5 March, 2025

The **Joint Research Centre (JRC)** of the European Commission has launched a new call in the framework of JRC Open Access to its Research Infrastructures. This is the first call launched by the EU Reference Laboratory for alternatives to animal testing.

The **Call offers access to the JRC in vitro High Throughput Testing (HTT)** laboratory. This opportunity is available to users who wish to automate their in vitro methods to assess their transferability, reliability, and overall performance. By generating large datasets from bespoke compound libraries, this initiative supports the evaluation of a method's relevance for specific applications and advances the implementation of non-animal approaches to toxicological testing for the regulatory safety assessment of chemicals.

The call deadline is 31 March 2025.

More information about the call and how to apply on the following [webpage](#).
